

Frontend Developer & Freelancer

Profile Summary

Passionate and dedicated Frontend Developer with 2 years of hands-on experience in developing user-centric web applications. Skilled in optimizing website performance and collaborating with cross-functional teams to deliver high-quality products. Having a proven track record in contributing to product growth and enhancing user experiences through efficient and engaging digital solutions.

Projects

Qoruz.com: Started with SEO optimization and performance enhancement of the existing website to bring traffic and improving page load speed. Took over a new website project from scratch, using **React.js**, **Next.js**, and **Tailwind CSS** and created numerous global reusable components, enhancing development efficiency.

Drag-and-drop feature: Built this amazing drag-and-drop card feature that changes data dynamically. It can be easily used in any MVP. Check out here: [Drag & Drop feature](#)

Relevant Work Experience

Qoruz • Frontend Developer

August 2023 - Present

- Crafted responsive layouts, optimized website performance, and refactored code to enhance readability and maintainability, reducing development time.
- Spearheaded the development of a new website from scratch using **React.js**, **Next.js**, and **Tailwind CSS** creating global reusable components and delivering the project on time with full **SEO optimisation**.
- Transitioned to the product platform, introducing **Redux Saga for state management**, and developed key features like API calls and download notifications, contributing to product growth and innovation.

Freelance • Frontend Developer

Nov 2022 - July 30th, 2023

In this period, I have done two freelance works. My experience with them are given below:

- First I worked for a **Trading Application** where I built the landing page of the website with reusable components. I have got experience with Storybook and Daisy UI. See [here](#)
- Second, I worked as a front-end developer at GoSchedule. I developed the whole dashboard along with the integration of Google Meet in our app. I worked on making it screen-friendly (responsive) as well.
